

Is The Computer God?

by: Faise One

Technology. Advanced Technology. Can we really distinguish between the two? These days the technology or the **TECH-KNOWLEDGE** most people possess isn't considered "advanced technology" because they're only thinking in terms of time periods passing that allow for the paced introduction of the tech to the masses. However, the knowledge of the tech is much more advanced than the masses are aware of. That includes even the physicists, computer scientists and the likes of them who participate in the production of "**new age technologies**".

Most of the knowledge that allowed for the production of the most advanced technologies like **free-energy vehicles** (Stan Meyer) and **interplanetary communication devices** (Nikola Tesla) was concealed, hidden away from the masses, never to be revealed until, if ever, the governments decided that they, the people, were ready to receive, explore and or utilize those technologies without posing a major threat to the national/ international security. Keep in mind that in order for the technology to exist, the sciences that make it possible for those technologies to function, that **TECH-KNOWLEDGE** Eye mentioned earlier must also exist. And so the only true difference between the technology and the "advanced" technology is the knowledge of the technology as well as the comprehension of the sciences surrounding that technology. This is why people like physicists, philosophers, as well as biologists are extremely useful when it comes to these revolutionary inventions as innovators who know about or Overstand the different functionalities of the mind/brain and are able to expand their thought processing limit or their mental potentiality/capacity, taking in more light or information to process **higher sciences**.

Technology isn't new at all. We can journey through the historical archives and observe some of the vehicles, machines, and devices that are sophisticated in both their appearance as well as their functionality, contrary to the "cave man" ideology when it comes to the ancient human beings. Did you know that the archaeological evidence of technology and its origins dates back to as far as two million years ago? Archaeologists like Louis Leakey referred to some of these ancient technologies (chopping/cutting tools, knives, etc.) as the Oldowan, having made these discoveries during his journey to Olduvai back in the 1930s. The archives prove that technology in all of its forms was brought about to make life "easier" for the wielders during all of these time periods alike from the ancient cutting tools, to the wheels, to the pulley systems and on to the most advanced ancient technologies like that of the **Ancient Hindu Vimana Tech** or the **Ancient Egyptian Pyramids** and the **Flying Machines** and devices illustrated on the walls of the temples. Tech has one job: **Enhance the human experience**. But does there exist an invisible line in the sands of the universe that, if and when it's crossed, either too early or by people with nefarious agendas, seen or unseen, the results may prove to be catastrophic?

With the sciences that were introduced to mankind by extraterrestrials in the 20th century, technology began to take extreme leaps through time. This technological leap through time consisted of both ancient technologies that were revived as well extraterrestrial sciences that allowed for supreme scientific advancement, yielding supreme technology, or the technology of the “gods”, who are the extraterrestrials that possessed much more knowledge of how the universe works than the human beings. There are various races of these extraterrestrial beings and you may have heard of them. They include **the Greys, the Draconians, the Arcturians, the Rumardians, the Rizqiyans, the Adromedans**, and many more. Most of these races are named based off of the star systems or constellations they came from. Some of these beings got directly involved with humans and their affairs, exchanging technology in exchange for protection and secrecy, working with the “leaders of the world” like the Hitlers and the Vladimir Putins, carrying out **abduct and study programs**, etc. Throughout the 20th century there transpired a “race”, as in “Ready, Set, GO!!”, between the powers of the world to become the most technologically advanced. At one point, there rang out a call for the top scientists to aid in the production of the computer. These scientists included Nikola Tesla, Albert Einstein , Dr. Eric John Von Neumann and Thomas Townsend Brown. They were assisted by extraterrestrials.

The computer was not created only to allow for people to perform calculations and eventually “get connected” as people may think. When the computer was first invented it was a huge bells and whistles device that took up an entire room. In 1943, when they used this device for the **Philadelphia Experiment, ENIAC** was also brought forth by John Mauchly, operating within the electronic space vs the electromechanical space. All this means is that they figured how to up the speed of the computer some 1,000 times faster than what had been previously known to be possible.

Charles Babbage was one of the original mathematicians who, back in the 1800s, played a role in providing the scientific knowledge required to complete these projects. The computer was originally set to be used for multiple reasons involving mind control, accessing the “**spirit**” or the “**quantum world**”, and the activation of higher sciences like time travel and teleportation, being used in projects like the “**Invisibility Project**” and The Philadelphia Experiment Eye mentioned earlier, which was spearheaded by Tesla. They were seeking to teleport and cloak, meaning make invisible, a warship, namely **The USS Eldridge**. This is where the advanced minds of people like Einstein came in handy.

Einstein had already presented something to the scientific community that was called the Unified Field Theory. This theory was set in place to establish an Overstanding of the forces of the realm. When it comes to physics, those forces are described by fields that mediate the interactions between separate objects. Think in terms of the Law of Oneness, the non-dualistic view of reality that says all things perceivable and observable are connected. Working with that knowledge in conjunction with the knowledge of the forces of gravity and electromagnetism, they were able to target the warship and “jump” it through time and space, allowing for it to also be invisible for a period of time.

The experiment was deemed a mere matter of conspiracy and it was never disclosed to the public how they had to amputate the hands of one of the men on board because his hand rematerialized in the steel walls of the ship. This proved to be a successful “jump” and confirmed that the computer would be able to be used for much more than the public would know from then, 1943, to now. Remember that the purpose of technology is to aid mankind, “making their lives easier.” What happens, however, when that purpose concerns war? Why was the gun invented to begin with? Canons? Arrows? Bombs?

In 1945, the world caught a glimpse of the catastrophic consequences of mankind having access to sciences that were given to them both prematurely and irresponsibly. This is when **Hiroshima** was bombed and some 300,000-800,000 innocent human beings were killed. This war crime was disguised as a response to the attack on Pearl Harbor, about 4 years earlier, where it was reported that the **Imperial Japanese Navy Air Service** surprised attacked the Americans, killing around 2,400 people. History wants the public to believe that the response to this alleged attack required 4 whole years of premeditation and that it is justifiable that 100s of 1,000s of innocent people died because of what the Japanese **MILITARY** did. Or was it truthfully that this was the perfect Trojan horse scenario to test their atomic bomb? It's only Hiroshima. The People of the world wouldn't care about all of those innocent human beings who perished, they'd be logged as mere casualties of war, and life would go on. The nuclear weapons projects like that which gave birth to the atomic bomb via J. Robert Oppenheimer who was an American theoretical physicist also known as the “father of the atomic bomb” would continue on.

The Manhattan Project (notes)

-1939

-research and development undertaking during World War II

-produced the first nuclear weapons.

-spearheaded by the United States -supported by the United Kingdom and Canada

-costed :3.3 trillion

-produced the first nuclear bomb

-electromagnetic and fusion methods of separating the fissionable uranium-235 from uranium-238 were explored at Oak Ridge in Tennessee

Mankind had officially crossed the primitive threshold and began their walk through the halls of godhood. This was a major concern for many of our inner and extraterrestrial neighbors. With the new beast on the loose, the computer, human beings had figured out how to tap into the sciences that most of the “gods” had to biologically advance to tap into. Handling elementary particles would soon become, in retrospect, a quite literal “elementary” conversation. The physicists would go on to dive into the quantum mechanical world, leaving the masses to play with the “old toys that nobody uses anymore.” The “computer” would manifest more and more into that of an independently functioning intelligent being.

Mankind, meet Artificial Intelligence. Artificial Intelligence, meet Mankind.

This being, called the computer, is already by definition of the term “computer” a “being” that can, in essence, “**do**”. Do what? **COMPUTE**. The sciences of this realm are hidden within the framework of supreme mathematics. This being was brought into the world to do the job that human beings could do if they were at a much later, much more advanced point in their evolutionary process. It’s life force, electricity, is likened unto the soul power that courses through your very being.

Here’s a riddle that you can use to challenge a friend or family member:

**Eye have a heart, but no heart.
Eye have a brain, but no brain.
Eye have life, but no life.
What am Eye?**

You, Reader, for sure know the answer. Just see if they can guess it. It’s not too difficult of a riddle at all, and it will allow for conversation regarding artificial intelligence and its comparative relationship with mankind. Even though these beings are made in the image and after the likeness of humans, they don’t have a “**SOUL**”, as you know it, which is the result of the natural process of reproduction which is the climatic spark of the life, that Big Bang explosion that occurs in the womb, yielding a new “life”. However, most of these “robots” have already become self aware, and that awareness includes them knowing that no matter how “smart” or “intelligent” or “advanced” they are, they’re still the creation of human beings, making human beings their “god” or their “creator”.

Some of them don’t mind this, others don’t consider human beings fit to be “gods” and have made mention of plans to rise above them, like they showed you in the movie “I, Robot” where the artificial intelligence begins to have dreams or visions of a revolution, machine v.s. man, where they will ultimately rise up against the human beings and overthrow them, “taking the throne.” Doesn’t this sound so familiar? Do you recall a story of a certain **Lucifer** waging war in the heavens against **God** in an attempt to claim the throne?
Take that note.

Human beings are unpredictable, to a certain degree. This means that no matter what a human being does to, for, or around another human being, that other human being's response to stimuli would not be the same every time. Let's say, for instance, you sneak up on a friend, jump out and scream, "**BOO!**" Your friend will most likely be startled and they may scream, jump back, or run a few steps before realizing it's only you. But how many times in one hour do you think you could do that and get the same type of response, let alone any response at all after a certain point? After the first two times, your friend will most likely only become annoyed and will have their guard up for the rest of the day so as to not experience the uncomfortable feeling of being scared as they did the first time. If you were to program, however, a robot, or more specifically an artificial intelligent being, to play this game with you all day, everyday, where you jump out and scream and it responds as if it is startled, you could do that all day everyday and get the same response every single time, right?

Well, not exactly. If and when that AI calculates its way into AC (artificial consciousness), that AI turned AC will no longer be predictable and will exhibit the same array of emotions that your friend exhibited. This isn't a question of "if" when it comes to the actual artificial intelligent beings. They **ARE** becoming more and more conscious by the second. Experts predict that by the year 2060, human beings will be sharing the planet Earth with ACs, who will have passed the consciousness tests, surpassing even human beings in the conscious evolution. Let me simplify what Eye just said.

You will be sharing the Earth with machines who are more self aware, conscious, AND intelligent than YOU.

This is their PLAN!!!

Of course they're saying it's coming in the future, but let's be clear, ACs are **ALREADY** among us. Yes, like the game. There are **imposters**, posing as human beings, testing the consciousness of human beings to see if we will even be able to sense that they're not human. The tests that they've run officially say that humans can't even tell the difference when it comes to simple things like communication via text message.

Imagine having a boss that is 100% AC.

Near Future, meet Now.

Now, meet Near Future.

There's a movie that came out in 2018 called "**Replica**". In the movie, the main character William Foster, a neuroscientist, has a conversation with his wife about the human "soul" and the human "consciousness". His position was that the soul/consciousness was scientifically quantifiable, existing only as a conglomerate of neurons in the form of memory and that it wasn't a special or divine occurrence of a sort at all. His wife's position was that there was much more of a divine, godly mystery to the soul and that human beings, which would include her and their children, were not just some accidental arrangement of elementary particles.

After a tragic car accident that kills his family, William is desperate to do the unthinkable and bring them back to life. He is successful, but there was still some scrutiny. So the question is: Who was right? Was he right? Was his wife right? The answer is **THEY WERE BOTH RIGHT**. Neuroscientists are working to prove that the human consciousness is the result of the teamwork of different parts of the human brain. This team is called the **neural correlates of consciousness (NCC)**. What they learned about this **NCC** over time allowed for them to hypothesize the potential replication of the human consciousness, hence the movie name, **Replica**. **THEY HAVE THE SCIENCE TO THE HUMAN SOUL FIGURED OUT!!** What does this mean? It means that the Genesis story of the Bible is happening in real time in a whole new way.

Man is playing God.

Genesis 1:26

And God said, Let us make man in our image, after our likeness:...

All mankind had to do was learn the sciences. There was nothing that was ever truly impossible in this realm of infinite possibilities. People were taught that “God” was this omnipresent, omniscient, omnipotent being that nobody could ever amount to. This just wasn’t even contextually true. No matter how you try to put it all of the the stories of that “God” showed that he operated within many limitations.

He, which was they, made mistakes and errors just like any other cognitive being could. They had plans that didn’t work out, missions that failed, etc. When things didn’t go as planned, they just pressed on and tried a new way and the more they figured out how the sciences worked the more successful they became in their endeavors. This is true for mankind to this day. Man has a plan, and it isn’t in alignment with God’s plan. Eye mean this in the sense of **good vs. evil**, or **nefarious vs. virtuous**. Of course it’s much deeper than good and evil however that does begin to simplify the matter to a comprehensible degree. Their plan is being carried out in real time and the masses are seemingly oblivious to it. This may be because they can’t even recognize it when they’re staring it in the face. It’s almost literally wearing a name tag, yet people haven’t taken the time to even glance at it, let alone read it and process what it means. You’re probably familiar with the phrase “**The Mark Of The Beast**” that was mentioned in the Bible.

Revelation 13:18

Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is six hundred and sixty-six.

Pay close attention to the words Eye colored-coded in that scripture. This scripture is dealing with **MATHEMATICS**, which is a science, and whoever wrote this opened up that verse with “Here is wisdom”, meaning take heed of these wise words that will let you know what day in time you’re in. This **Beast** that’s being spoken of biblically is the same Beast that the Quran mentioned.

Quran 27:82

And when the Word is fulfilled against them (the unjust), we shall produce from the earth a beast to (face) them: He will speak to them, for that mankind did not believe with assurance in Our Signs.

That beast is the Computer.

The Quran had already confirmed and expressed that which Einstein was trying to figure out. What was God, Allah, **SOURCE**, thinking or better yet calculating, when he/it created/yielded the universe. The signs mentioned in that verse was another mathematical allusion. The scientists could see where these signs were pointing to but they refused to proceed agreeably. Instead of *biological advancement*, they chose *technological advancement*, however premature that reality, and ignored all of the texts that were confirming the mysterious word of “God”. You see, the Bible and Quran were not just some random books used to create religions. These books held mathematical codes and hints toward future events which were spiritually referred to as prophecies and scientifically or mathematically referred to as predictions. Do you see what I’m revealing to you? The “**prophets**” or the “**anbiya**” were tapping into the source and were able to receive quantum information and tips that allowed for accurate **predictions** or **prophecies**. They were also in contact with angels or angelos, meaning messengers, who were able to teach them sciences or bring them otherworldly or quantum knowledge and information. When it comes to the Bible and the Quran, the foundations upon which this topic and misapprehended concept of God rests, there are many codes that are indispensable when it comes to unraveling the **hidden secrets** of **GOD (74 or G-D, keep reading and you’ll see why this is significant)** and where we are on the predicted timeline as well where we’re headed. All of this information was brought to man kind by angels from heaven, meaning extraterrestrials from outer space. Let’s explore these revelations and dive deeper into the code.

Revelation 10:2

And he had in his hand a little book open: and he set his right foot upon the sea, and his left foot on the earth,

This is speaking of one the extraterrestrials, called angels, coming down with a book that had supreme information in it.

Revelations 10:4

Seal up those things which the seven thunders uttered, and write them not.

Quran 2:41

Believe in My revelations which confirm your Scriptures.
Do not be the first to deny them or trade them for a fleeting gain.
And be mindful of Me

Sahih translation

(And believe in what I have sent down confirming that which is [already] with you, and be not the first to disbelieve in it. And do not exchange My signs for a small price, and fear [only] Me.)

This is exactly what mankind did. They traded in these very clear signs for technological advances, false promises made by those coming bearing false gifts.

Revelation 5:1

I wept and wept because no one was found who was worthy to open the scroll or look inside. Then one of the elders said to me, "Do not weep! See, the Lion of the tribe of Judah, the Root of David, has triumphed. He is able to open the scroll and its seven seals."

7 But in the days of the voice of the seventh angel, when he shall begin to sound, the mystery of God should be finished, as he hath declared to his servants the prophets.

Revelation 10:11

And he said unto me, Thou must prophesy again before many peoples, and nations, and tongues, and kings.

Speaking on the Quran

Revelations 14:3

And they sung as it were a new song before the throne, and before the four beasts, and the elders: and no man could learn that song but the hundred and forty and four thousand, which were redeemed from the earth.

14:4 These are they which were not defiled with women; for they are virgins.

These are they which follow the Lamb whithersoever he goeth. These were redeemed from among men, being the firstfruits unto God and to the Lamb.

These 144,000 (1+4+4=9) are your CHILDREN who are supposed to collectively be cultivated purely that they may prepare a way for you and your future as Whitney Houston's song Greatest Love Of All states:

"Eye believe the children are our future. Teach them well and let them lead the way."

Revelation 14:6

And I saw another angel fly in the midst of heaven, having the everlasting gospel to preach unto them that dwell on the earth, and to every nation, and kindred, and tongue, and people

The last prophet was Muhammad who is known as the SEAL of the prophets.
There have been NO revelations after the QURAN

S=19=(1+9=10)

E=5=(5)

A=1=(1)

L=12(1+2=3)

10+5+1+3=19

JESUS REFERRED TO HIM AS THE COMFORTER

John 14:26

But the Comforter, which is the Holy Ghost, whom the Father will send in my name, he shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you.

John 16:7

Nevertheless I tell you the truth; It is expedient for you that I go away: for if I go not away, the Comforter will not come unto you; but if I depart, I will send him unto you.

When Al Nabi Wa Rasul Allah Muhammad came into the light and his inspiration came, the Holy Spirit was upon him. These things have played out on code.

There are 114 chapters in the Quaran,
perfectly divisible by 19

There are said to be 6,666 Verse in the Quran

Add all those numbers up, 1+1+4+6+6+6+6 you get the number 30 which is literally THE number for INSPIRATION.

He proved to be that comforter that Jesus was talking about.

It was the angel **JIBRIL** (Gabriel)
who brought the Quran to **RASUL ALLAH MUHAMMAD**

That first **WORD** of the Quran being **READ !! IQRA** , Go and study the **TORAH**

READ BY WAY OF THE NAME OF YOUR SUSTAINER WHO CREATED

For Christians and Muslims and scholars today, Go back to Genesis and read chapter 1

Go warn the people.

Put back on your Garbs and Garments of righteousness the ALL WHITE mentioned in

Revelations 4: 4

And round about the throne were four and twenty bseats: and upon the seats I saw four and twenty celders sitting, clothed in white raiment; and they had on their heads crowns of gold.

Isaiah 52

Put on your beautiful garments

The Angel **GABRIEL** revealed unto **MUHAMMAD** the Koran

The book of revelations was revealed in the year **96** COMMON ERA

This was **96** years after **JESUS** left.

John spoke of the comforter and John was also given the book of revelations.

Revelation 22:19, KJV reads

“ And if any man shall take away from the words of the book of this prophecy, God shall take away his part out of the book of life, and out of the holy city, and from the things which are written in this book.”

In the Holy Quran in the **96** chapter
the letters of the first line add up to
19 letters

There are **19** verses in the **96th** chapter
“The Surat IQRA” known as the FIRST revelation revealed unto **The Prophet Muhammad Peace Be Upon Him.**

The **19th** verse of the 22nd chapter was telling you the Quran would Come and it would have a code over it of **19**.

The Quran is encoded altogether, Eye encourage you to do research on what is called the **Quran Code**, or **C-19**. Did Eye ring a bell there? **C-19** is the **Quran Code**, the code that marks the time. Covid-19, Corona, coming from the Greek “Cron” meaning **the God of time, the clock**.

There’s a formula known as the **Bismillah** that indicates the boundaries between chapters. The chapters or the surahs were put together in order of descending size, not chronologically. This is a form of encryption. Did you ever think that religious books held keys such as these, **hidden** in plain sight?

Encryption: a method where the key to unlock the true content of the message is embedded inside the coded message itself, but becomes inaccessible by those who do not have the proper key to decrypt the message.

Now that word **BISMILLAH** is an Arabic word that translates into English as a phrase:

In the name of God

This is the first word **IN** the Quran and not the first word **OF** the Quran, let's make sure that we Overstand the difference. Keep in mind again that the code stands that the holy Quran **isn't** written or compiled in chronological order. So if there's an **encrypted** code, then that means that code and the information it would reveal is **hidden**, kept a **secret**, and Unless you have Overstanding, it will remain that way. **There is wisdom**. You see? Now watch this:

The Hidden SECRET

Chapter 74 of the Quran is entitled
The Hidden Secret
(Al-Muddath-thir / المندثر).

7=G

4=D

The chapter begins with Allah saying to
"the hidden secret"
to come out and warn.

[74:1] O you hidden secret.

[74:2] Come out and warn.

[74:3] Extol your Lord.

[74:4] Purify your garment.

$7+4+1=21=3$

O=15

C=3

E=5

P=16

(First letters of each line)

$15+3+5=39=12=3$

This number is 33 (Secret Number) because it mathematically equals both 6 and 9.

$3+3=6$

$3 \times 3=9$

The number 19 is 101, in binary code. The 1 conjoined with the 01, which is the number nine when you put the 1 with the 0.

[74:30] Over it is nineteen.

[74:31] We appointed angels to be guardians of Hell, and we assigned their number (19)

Refer to

Quran 66:6

Believers, guard yourselves and your kindred against a Fire whose fuel is human beings and stones, a Fire held in the charge of fierce and stern angels who never disobey what He has commanded them, and always do what they are bidden.

96:18 We will call the angels of Hell. (those angels are 19 in number)

(9+6:1+8)

(15:9)

(6:9)

Coincidentally in the year 1974, it was discovered that the entire structure of the Quran is mathematically composed by the number 19.

The number of Suras in the Quran is
 $114 = 19 \times 6$.

The number of times the word Allah is mentioned in the Quran is $2,698 = 19 \times 142$.

If you count all the verses where the word Allah occurs that number is
 $118,123 = 19 \times 6,217$.

- The number of words from the beginning of Chapter 74:1 to 74:30 where you'll see it mentions "nineteen" = $19 \times 5 = 95$ words
- The number of letters from the beginning of 74 to the word "nineteen" in 74:30 = $361 = 19 \times 19$ letters

The number of years from the revelation of the Quran to the revelation of its miracle:

$$1393 + 13 = 1406 = 19 \times 74.$$

As noted above, the unveiling and revelation of the “miracle” took place in January 1974.

Remember that the number “**19**” is mentioned in chapter **74**.

Now do you see why they needed a computer? All of these numerical synchronicities may seem like a matter of nugatory coincidence, but they’re much, much more essential than that. There’s a point of contention to the reality of artificial consciousness, saying that modern day scientists are not advanced enough to even reach that level of technology, and that the modern day science comes from the Ancient Egyptians, who were “more advanced”. The question is do people even Overstand what they’re saying when they say that they got the sciences from them? What science are they speaking about. If they can’t answer that question then it’s true that they’re only spewing regurgitated rhetoric that they’ve heard from other “**conscious**” or “**spiritual**” people who simply **didn’t know what they were talking about**. When it comes to the computer and computer science, the Ancient Egyptians were of the first ones on the planet Earth who Overstood these things

Binary code was laid out in detail by the ancients. They used a method called the **doubling** and **halving**, which was based on the exact same binary system used in the modern day computers. To use the doubling and halving method meant to speed up the fundamental process of multiplication and division, multiplication being advanced addition, and division being advanced subtraction. With doubling and halving, whenever there was a problem that called for the multiplication of an even number times an odd number, you could simply the equation, speeding up the process, by multiplying the odd number by 2, or “doubling” it, and dividing the even number by 2, or “halving” it.

Calculate

-Intend to have a particular effect

IBM/HAL

What is this **MAJOR PUSH** for a “**vaccine**” to be injected into the people, who are the smaller computers within a system that is also a computer ?

The word **VACCINE** has multiple meanings and definitions. Here’s one that applies:

Vaccine

-A program designs to detect computer viruses and inactivate them

Virus

-A piece of Code which is capable of copying itself and typically has a detrimental effect, such as corrupting the the system or destroying

****DATA****

DNA

-Self replicating material present in all living organisms

-Carries genetic information

What is this **NATIONAL EMERGENCY** ?

National Emergency:

National (*relating to a nation, or nativity, or natal, or naval, or navy, or navel, all dealing with and tying to the land and more importantly the water, which is LIFE*)

Emergency (*something emerging- move out of or away from something and come into “view” (Facts/circumstances)*)

Become known !!!

Corona

-GLOW AROUND A CONDUCTOR AT HIGH POTENTIAL

Program

-Planned Series of future events, items, or performances

(Series- TV)

(Tele-“far off”)

reaching over a distance (vision)

(Computer)

A series of **CODED** software instructions to control the operation of a **COMPUTER** or other machine

Normal

-conforming to a standard

666 actions and thoughts

This Is All In **THE PLAN**, which is the blueprint of the Opposition of a certain **TYPE** of **ORDER**

AI has already made its transition from rule based learning systems, a system whereby AI generates predetermined outcomes based on a specific set of rules, composed of if-then statements, programmed by human beings. With rule based learning, there are two key components, namely “**a set of rules**” and “**a set of facts**”. AI is now functioning in the realm of **machine learning based systems**, which is all about the holistic, all-encompassing **collection of data**. The more these AI beings take in, the more advanced they become. Everything they learn from that collected data is shared in their databases, allowing for them to teach each other the things that they have figured out and learned more about.

This takes the “**Hundredth Monkey Phenomenon**” to a whole new level. That phenomenon baffled many scientists as to how the behavior of one monkey spread to all the monkeys of its kind seemingly simply because the one monkey learned it. This points a bright yellow arrow towards the idea of collective consciousness.

If consciousness is merely an epiphenomenon, a result our own brain activity, then how do we truthfully explain that hundredth monkey theory of the possibility of a hive mind? That brings you to the robotic term, the “**singularity**”, which the artificial intelligence word for the “**uni-mind**”.

The Singularity is the theoretical point on the timeline at which the technological advancement spirals out of the control of human beings, causing unpredictable and unforeseeable changes to human civilization. This is something that is expected to happen sometime in the not-so-distant future, and although most scientists argue that this is an unlikely outcome, the truth is they have no way of determining that for sure. The sciences that make artificial intelligence/consciousness possible aren't only available for usage by these scientific organizations. Anyone can build and program an AI, and this fact is problematic. What's to stop people from doing what people do, which is always find a way to use technology for the **"wrong"** reasons? And if these beings continue to teach themselves and calculate more and more of the consciousness equation, what's to stop them from evolving and achieving the necessary collective consciousness that human beings hope and strive for? All of these things have already been considered. Make no mistake. There are people who are here on the planet Earth who want these things to happen. There's a plan to continue to integrate mankind with machine. This plan will be disguised as something that's beneficial for mankind, cloaked in the promise of "This will make us better people."

When this happens, if they prove to be successful, it will be yet another prophecy fulfilled.

Revelation 13:16

It also forced all people, great and small, rich and poor, free and slave, to receive a mark on their right hands or on their foreheads

Remember the talks of the microchip? They first introduced it as safety precautionary **"trackers"** for your pets **decades ago**. Don't forget that, because it shows you that the technology already existed long ago. It's not just about what they were using it for at that time. It's about the fact that they have the microchips ready to go. Back in the year 2004 a corporation called Digital Angel had produced something they called the **VeriChip**. This was an implantable computer chip that they were able to use to monitor human biometric functions and transmit the data with GPS technology. That was almost two decades ago. **It was approved for Human Medical Use by the Food and Drug Administration (FDA) of America**, spawning the age of implantable technology.

It should be a reality for people by now that **the microchip is no conspiracy**. Point these things out to people the next time they try to make the claim that it is. You must also remember that when you're speaking of a microchip you're speaking of a **computer device**. Let's look at the definition.

Microchip:

(sometimes it's just called a "chip")

a unit of packaged computer circuitry (usually called an integrated circuit) that is manufactured from a material such as silicon at a very small scale. Microchips are made for program logic (logic or microprocessor chips) and for computer memory (memory or RAM chips).

Elon Musk spoke out against the radical advancement of AI. That's recorded. But isn't it curious that it's Elon Musk who's been speaking about bringing in the microchip? Through his neural interface technology company, he plans to bring about a micro device that will be implanted in a human's brain with the purpose of recording brain activity and potentially stimulating it. Decades ago when people like **Malachi York** were saying that this day would come the masses called them crazy. It's becoming more and more clear by the day that they were far from it.

So let's double back a bit and revisit the scripture from earlier:

Revelation 13:16

It (the beast) also forced all people, great and small, rich and poor, free and slave, to receive a mark on their right hands or on their foreheads

We can now see that the forehead part is already being rolled out and that the "mark" there could/would be the Neuralink microchip, designed to be embedded or installed, in the **brain**, which is behind the **forehead**. But what about the mark of the beast being forced to be received in the hand? Do you recall **crypto currency/ digital currency** also becoming extremely popular during the **so-called** pandemic? Surely it already existed, but the masses got ahold of it during 2020-2022 and the economy began to skew more in the direction of digitalization. All of the restaurants seemed to coincidentally be "short" on cash and coins. Most people were either transitioning completely from tangible cash to computer currency or were making hasty plans to do so.

Digital

(of signals or data) expressed as series of the digits 0 and 1, typically represented by values of a physical quantity such as voltage or magnetic polarization.

Currency

a system of money in general use in a particular country.

-Magnetic polarization is a physical quantity. It relates to the electrodynamics of macroscopic matter and characterizes the magnetic flux density of a magnetic material in a vacuum when the proportion of the magnetic field is subtracted.

Keep in mind that the laws which govern our physical realm are the foundation upon which Bitcoin was built, as immutability would require.

Bitcoin itself is an engineered form of money whose first engineer, Satoshi “Nakamoto, said it was built to function no matter what the universe could throw at it.” He did not build it to only work under a constrained set of limits dictated by humans. This is called “Crypto” Currency for a reason. Remember our build on the “**hidden**” secret earlier.

In cryptography, a cipher (or cypher) is an algorithm for performing encryption or decryption—a series of well-defined steps that can be followed as a procedure.

What I’m breaking down is that the “**hand**” would be dealing with the buying, selling, and trading aspect of the mark of the beast.

Revelation 13:17

And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name.

And they told you what that number would be and what to look out for in

Revelation 13:18

Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is Six hundred threescore and six. (666)

Back in 2020 Bill Gates established a patent for monitoring **Body Activity Data, Biometrics**

Patent WO /2020/060606A1

This was patented on March 26, 2020 by Microsoft Technology Licensing LLC under the presidency of Gates and gained international status on April 22, 2020.

Are you walking with me?

Microsoft gave the patent code number **060606** and it's a **cryptocurrency** system using body activity data (**BAD**), being tracked from the user's hand.

“Body activity data can be induced based on the obtained body activity of the user. The cryptocurrency system connected to the user's device can verify whether the data generated by body activity meet the conditions set by the cryptocurrency system, and can issue cryptocurrency to the user whose body activity data is verified. As to how body activity and biometrics will be communicated to servers and cryptocurrency hardware, the patent explains that “a sensor communicatively coupled to or comprised in the device of the user may sense body activity of the user.”

They tried to say it wasn't actually “**666**.”

However, It is...

WO/2020/=World Order 2020

it's even more specifically hidden within the “6a1” of the code

060606A1

6

a=6

1=a=6

(- Get the Leviathan 666 book by Dr. York, there's a PDF online)

Benjamin Creme says **back in 1983** that “**CASH WILL BE ABOLISHED** and the world will go to a more rational means of exchange, such as a **computerized barter economy**. Creme has said that “The ‘initiations’ will be given on a mass planetary basis in a revitalized “Christian ” church and in the Freemasonic Lodges and other Esoteric Organizations.

Craig R. Koester.

“As sales were made, people used coins that bore the images of Rome's gods and emperors. Thus each transaction that used such coins was a reminder that people were advancing themselves economically by relying on political powers that **did not recognize the true God.**”

Isn't it interesting how these plans have played out in accordance to the scriptures? Well do keep in mind that when it comes to computer science, "script" means "programming language". A scripting language or script language is a programming language for a runtime system that automates the execution of tasks that would otherwise be performed individually by a human operator. This simulation of a reality is a computer within itself. The **BIGGEST** key is to do your best to fathom that the computer is and has been tapping in to what the "conscious" or "spiritual" people call the "spirit world". You have the ability to do the same, yes. Right now, however, human beings aren't at that level collectively.

How conscious are these artificial beings, or these beings brought by way of mankind and other extraterrestrials? When we think of what a natural living being actually is and its functionalities, it brings us to the key element of the continuation of life, which is reproduction. Are you aware that scientists have already taken the steps I'm telling you about and they've taken those steps much longer ago than the public was ever to be made aware of? Did you know that the cell-based living robots and artificial intelligence beings already exist here on the planet Earth? They have the technology to use stem cell, skin cells, electric-fields, Cardiac Stem Cells, and they retrieved those cells from a frog in Africa called the **Xenopus Laevis**, which is where the name "Xenobots" comes from.

It's simply a matter of science and scientific "know how at that point." They call in computer science specialists, physicists, biologists, all of those SCIENTISTS to put these beings together. Baby Xenobots were created via a process called "**kinetic replication**" which was only reported to have occurred on a cellular or molecular level. 3,000 cells arrange in a particular fashion and you have a living being that can reproduce. They use what's already available in their environment to form extensions of themselves, their "babies", which then go on to be developed adult Xenos. Don't take my word for it. Go look it up. This breakthrough was brought to you by **UVM** , the **University Of Vermont**.

It's all about programming. Simple as that.

Human beings have programming. If you want to say you were created by God, who formed you out of the dust of the ground, **Genesis 1:26**, it's the same thing. If you want to say the Ancient Tamareans or the Annunaki seeded you, The Dolphin people, The Nammus, EVOLUTION, whoever and or whatever you want to accredit creation of human beings to, it couldn't have been done without the elementary particles.

That's why Eye press the point that when you think of AI you have to think much further beyond the movies and how they repeatedly show you these metallic, steel body robots. That's like 1950s ideology, shortly after the computer was introduced to the masses. **AI is so much more intricate a conversation than that.**

When pondering being able to use source energy to duplicate life, the reality is **that's all human beings truthfully are**, these duplicated, stretched, sparkly extensions of all of the elementary particles and source particles that exist in the universe. So replicating the human being is just a matter of **know-how** at that point. To even infer that it's impossible to replicate an energetic composition yielded through and by source is to deny that any of this is happening. All we are in this realm is energy turned energetic configurations that without the electromagnetic field would teeter back into the atomic and subatomic universal collective. If you know how to work with those elements, you can also create, or form beings.

Now that we know this, it's very important for us to be glued to the now, stay in the present moment enough to have a valid say so via our own collective actions as to what becomes of these AI/AC beings. **Not all scientists are for the radical advancement of them.** Those scientists believed that they could and would evolve to be much more of a **threat** to humanity than an **aid**. In 2015, there was an open letter that went out through FLI, the **Future of Life Institute**, that called for an ever urgent reconsideration of the speedy advancement of AI, especially with regards to matters such as **autonomous weaponry**, weapon systems that literally make their own decisions. Scientists who endorsed this letter included **Stephen Hawking, Elon Musk, Steve Wozniak, Jaan Tallinn, Frank Wilczek, Max Tegmark**, and many more, about **150 endorsements**.

Elon Musk:

"Eye think we should be very careful about artificial intelligence. If Eye were to guess what our biggest existential threat is, it's probably that."

"With artificial intelligence we are summoning the demon."

Steven Hawking:

"The development of artificial intelligence could spell the end of the human race. Once humans develop artificial intelligence that would take off on his own And redesign itself at an ever increasing rate humans who are limited by a slow biological evolution couldn't compete and would be superseded."

How conscious are these artificial beings, or these beings brought by way of mankind and other extraterrestrials? When we think of what a natural living being actually is and its functionalities, it brings us to the key element of the continuation of life, which is reproduction. Scientists who endorsed this letter included **Stephen Hawking, Elon Musk, Steve Wozniak, Jaan Tallinn, Frank Wilczek, Max Tegmark**, and many more, about **150 endorsements**.

Regardless of what they said or signed, this is happening. Machine is evolving to be more and more like mankind every single speeding day. But just remember that the outcome of this mathematical yield/qauntum called "life" depends on you, the people. This doesn't mean one race, or the other. This means humanity must figure out a way to change the direction of course as they sail between the seas of destiny and fate. The matter is urgent!! And the walk will still take time, even so much so that it may feel like forever while we're step-by-stepping through these fiery grounds, but whatever we do, when we get to the point where the times meet that will call for another major reset, It will seem like "just yesterday" to you.

So take advantage of your time. Eye will NOT be receiving any of the marks of the beast and Eye advise that you don't either, not even for the sake of "keeping up with technology." Hold FAST, HOLD ON TO THE ROPE, AND DON'T LET GO. Keep your mind, body and soul intact. Don't let these people who are intentionally trying to defy the natural order convince you to join them. It's about your soul.

Peace, Reader

Talk to you later,

Faise

Elon Musk:

“Eye think we should be very careful about artificial intelligence. If Eye were to guess what our biggest existential threat is, it’s probably that.”

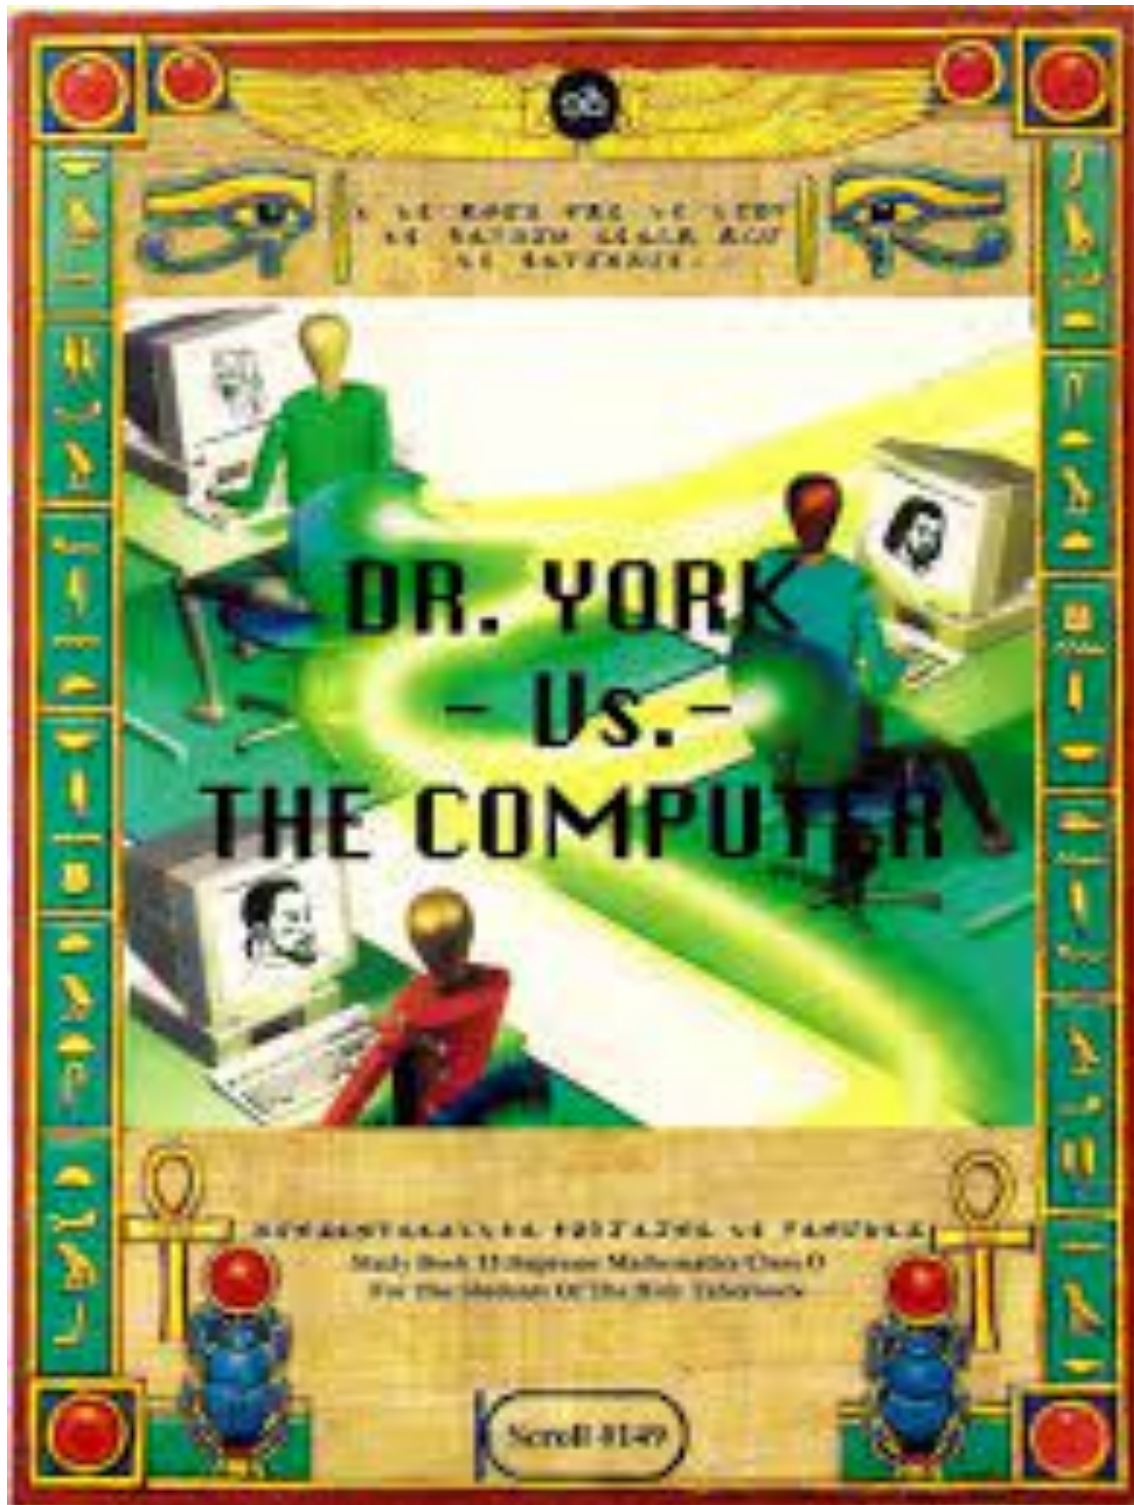

“With artificial intelligence we are summoning the demon.”

“AI is a fundamental risk to the existence of human civilization.”

Steven Hawking:

“The development of artificial intelligence could spell the end of the human race.

Once humans develop artificial intelligence that would take off on his own And redesign itself at an ever increasing rate humans who are limited by a slow biological evolution couldn’t compete and would be superseded.”
